A COMMENT ON THE STOCK OFFERED

Because the cuts illustrating the seedlings on our list do not give either accurate or adequate pictures of the stock we offer, we add this descriptive comment.

SCOTCH PINE, RIGA (Rigensis): a tree that grows full and well balanced with some shearing and of good color most years in most areas. In the 2-0, 4-8" grade they will run strongly over 8" with abundant fiber root growth.

SCOTCH PINE, AUVERGNE, RACE NOBLE: (So-called French Blue) Not separately listed but available at same price. Not as tall average as Riga, but strong seedlings.

FIRS ARE NOT SEPARATELY LISTED BUT ARE AVAILABLE IN WHICHEVER STRAIN YOU PREFER.

DOUGLAS FIR, TAXIFOLIA GLAUCA: a fine Rocky Mountain type tree, tends to blueish color, very good for either landscape or Christmas Tree. For size and quality of top and root we never grew such seedlings, average twice the size of last year's stock - and still at last year's price.

DOUGLAS FIR, CAESIA: a Rocky Mountain Christmas Tree type. Just as fine a tree in size and quality as Taxifolia glauca, but of a gray green color. All firs respond well to light or heavy shearing.

AUSTRIAN PINE: These trees, too, are the heaviest we've grown in this variety, a good percentage above 6" tall. It is growing in popularity as a Christmas tree, for one reason because it is always a good green color.

COLORADO BLUE SPRUCE: a wonderful stock for color, we think. Heavy stock again but average not quite as tall as last year. Larger size is 3-0, 4-8", some beds will run much taller. Strong roots. The 3-0, 2-4" stock is fine and stocky but limited in volume.

WHITE SPRUCE: NORWAY SPRUCE: BLACK HILLS SPRUCE: all three are fine stock. The White Spruce is the tallest we've ever grown, the Norway are very good, the Black Hills not quite as tall. All are 3-0 and strong seedlings.

Right now we have all these seedlings in volume to supply your needs. Each season we've sold out of every kind of seedlings, either early or late. So a reasonably early order will assure you of what you need.

THIS COMMENT MERITS YOUR ATTENTION

This year our stock of Scotch Pine, Austrian Pine, and Douglas Fir seedlings, all 2 year stock, are the best in root quality and sturdy, tall top of any we have grown.

Our 3 year spruces are fine, too, but not necessarily better than in the last couple seasons when we have had strong spruce stock.

If your order is reasonably early, our stock is big enough to take care of substantial demand.
